-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 4 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only and cannot depend from any other multiple dependent claim See MPEP § 608.01(n). Accordingly, the claim 4 has not been further treated on the merits.
2. Claim 4 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The device has been claimed in all of the previous claims. There are no other limitations in claim 4.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamada et al.(USPN 6174583 B1).

Yamada teaches a semiconductor heater comprising a ceramic substrate (1) with multiple conductor layers (6,9,22) to which an external terminal (10,23) is attached (figures 1 and 4). Connections are made through elastic, non-oxidizable layers (col 8 lines 20-65).

5. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Khoury et al.(USPN 6232669 B1).

Khoury teaches a semiconductor contact structure comprising a ceramic substrate with multiple conductor layers (22, 250) to which an external terminal (252) is attached (figure 9). Connections are made through elastic, non-oxidizable layers (250) (col 5 lines 1-25 and col 9 lines 15-54).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Uchiyama et al. (USPN 6534751 B2), Bishop (USPN 6182340 B1) and Boss et al.(USPN 4880684).
